

THE IDES OF MARCH

REDEFINING DIGITAL MUSIC ON BITCOIN

Welcome to the future of music ownership, where legendary hip-hop meets Bitcoin innovation.

The Ides Of March isn't just another music NFT—it's a revolutionary approach to digital music collecting and creation on Bitcoin Ordinals.

THE ULTIMATE

HIP HOP COLLABORATION

This isn't just about preserving the past—it's about building bridges:

- Money B {Digital Underground}
- Ras Kass {West Coast Pioneer}
- Numskull {The Luniz}
- Homeboy Sandman
- Bitoshi Blockamoto {Bitmap Creator}
- Kane Mayfield

THE PRODUCERS

CRAFTSMEN OF SOUND

Behind every great record are the architects of sound:

- Rare Scrilla
- Shower Shoes
- DJ Booman
- Trash Lights

BEYOND JUST LISTENING

For the first time in digital music history, YOU become part of the creative process. Each of the 2,100 Ordinals isn't just a collectible—it's your personal music creation station, disguised as a vinyl record:

 **Interactive Music Control:** Mix and match 13 unique beats with different artist combinations. No more being forced to listen to songs exactly as they're served. Choose your perfect combination of three artists over any beat. Your version, your vibe.

 **Built-in MIDI Sampler:** Turn your phone or desktop into a 16-pad sampler. Chop it up, flip it, make something entirely new.

🌐 **Bitmap Metaverse Integration:** Step into an ancient Rome-inspired Bitcoin world

🎮 **Hidden Features:** Discover secret tracks and exclusive content

🎁 **Special Airdrops:** Secure limited-edition Bitmap avatars (for top collectors)

🌐 **Direct Integration:** One-click connect with Unisat/XVerse wallets = instant access to all features

WHY THIS MATTERS

In an age where music can feel disposable, where streaming platforms reduce art to algorithms, we're creating something different. Something that matters. Something that lasts.

Think about it: In the past, when you bought music, you got what you were given. Period. Try to remix it? Illegal. Make your own version? Lawsuit. Share your playlist? Piracy. The music industry built walls between artists and fans, treating music like a finished product rather than a living art form.

We're tearing those walls down.

What that means to our collectors is this isn't just about owning music—it's about revolutionizing how we interact with it. Instead of serving you a finished plate, we're giving you the ingredients to cook your own masterpiece.

Through Inscribed.Audio's innovative platform, we're making premium Bitcoin music experiences accessible, while giving listeners the power to curate. Finally, the power is where it belongs: in your hands.

FOR YOU

THE TRUE ENJOYORS

You're not just buying an Ordinal. You're becoming a guardian of culture. Part of a community that understands that some things are worth preserving.

Every inscription makes you a valuable part of music history while gaining immediate access to everything... no "coming soon" bs

THE TLDR;

BREAKDOWN

- 2,100 unique Ordinals
- 6 iconic rappers at your command
- 13 interchangeable beats
- Infinite creative possibilities
- Flex in the Bitmap metaverse
- Everything available immediately

DON'T JUST COLLECT... CREATE

No twitter farming. No endless Discord grinding. Just collect and start experiencing music in a whole new way. The future of digital music isn't just about listening—it's about creating, customizing, and truly owning your experience.

This is the project that future music NFTs will reference. The blueprint. The moment everything changed.

So ask yourself: Do you want to be the one who helped make history? Or the one who had to hear about it later?

**NOT FINANCIAL ADVICE,
BUT DEFINITELY
MUSICAL ADVICE.**
